

Specification of Vulnerability Assessment System

S.No.	Parameter	Technical Specification	Remarks
1	Vulnerability Scanner	Should be able to scan various devices like Network Devices of various Top Brands, Operating Systems(Windows, MacOS, Linux), Software and Applications	
2	Features	Out of the box application with pre configured plugins and templates. Customizable report with live results of vulnerability assessments. Perform Target profiling, Configuration Auditing, Malware Detection and Sensitive data discovery	
3	License	Minimum 1 Year On-premises License	

Note : Installation and Demonstration is the responsibility of Supplier

Specification of Firewall Analyzer

S.No.	Parameter	Technical Specification	Remarks
1	Type	License Renewal for Existing Firewall Analyzer (ManageEngine EventLog Analyzer)	
2	Node Support	Minimum 2 firewall nodes	
3	Agent	Agent less log analytics	
4	Features	Log analysis, traffic management and monitoring, Network security management, Firewall policy management, User internet activity monitoring, real-time vpn and proxy monitoring, advanced alert and report management, web-application usage reports	
5	Log	Should support uploads for saved logs	
6	Firewall support	Multi-vendor security devices support	
7	License	Full Feature license for Minimum 1 year	

Specification of Forensic Tool Kit

S.No.	Parameter	Technical Specification	Remarks
1	Type	All-in-one digital forensics solution	
2	Capabilities	Email Analysis, File Decryption, malware detection, Data visualization, Creating images of hard drives, CDs and USB Devices, Optical Character Recognition	
3	Features	Forensic Imager, Encryption Support for Bitlocker and FileVault, Evidence Processing, Network Forensics, data Carving, Hashing (CRC,MD5,SHA1,SHA256), Metadata Analysis,Registry Analysis, Video Analysis,	
4	License	Minimum 1 Year for above mentioned functionalities	

Handwritten signatures and initials are present at the bottom of the page, including a green mark.
